

**A powerful  
GPS tracking &  
telematics platform**

## Who are we?

We are the software people! We expertise in delivering telematics and IoT software services. We've helped businesses of all types & sizes. But don't take just our word for it!! Here's our clientele in numbers:

## Behind-the-scenes

Ever wonder who makes your application so easy to use? Employees at Uffizio work hard to get every detail just right.

It all starts with our **business analysts**, who listen to client requirements and help them figure out ideal solutions.

Next, our design team takes over. They are our **software architects** and create application screens & modules.

The baton passes on to **development and testing** teams who spend many an hour—making sure there are no operational issues with your product.

Lastly, our **DevOps** team assumes control. They help with software implementation, maintenance, and deployment.

# Platform-independent

Run our application on any technological device, from anywhere you like! It can't get any more flexible than this! Or can it?

Access our application through the web or mobile interface.

Freedom of accessing all functionalities on any device

Run our application on the browser of your choice

Native Android & iOS applications

## Tracker-independent

Uffizio has an extensive hardware-partner network, so you'll easily find a device that works for you.

Freedom to choose hardware devices

Face zero compatibility issues

Trackers integrated at lightning speeds

Choose from 1200+ integrated devices

# Multilingual platform

Language preferences shouldn't affect business operations. That's why our platform can be accessed in a variety of languages.

Provision to add a new language

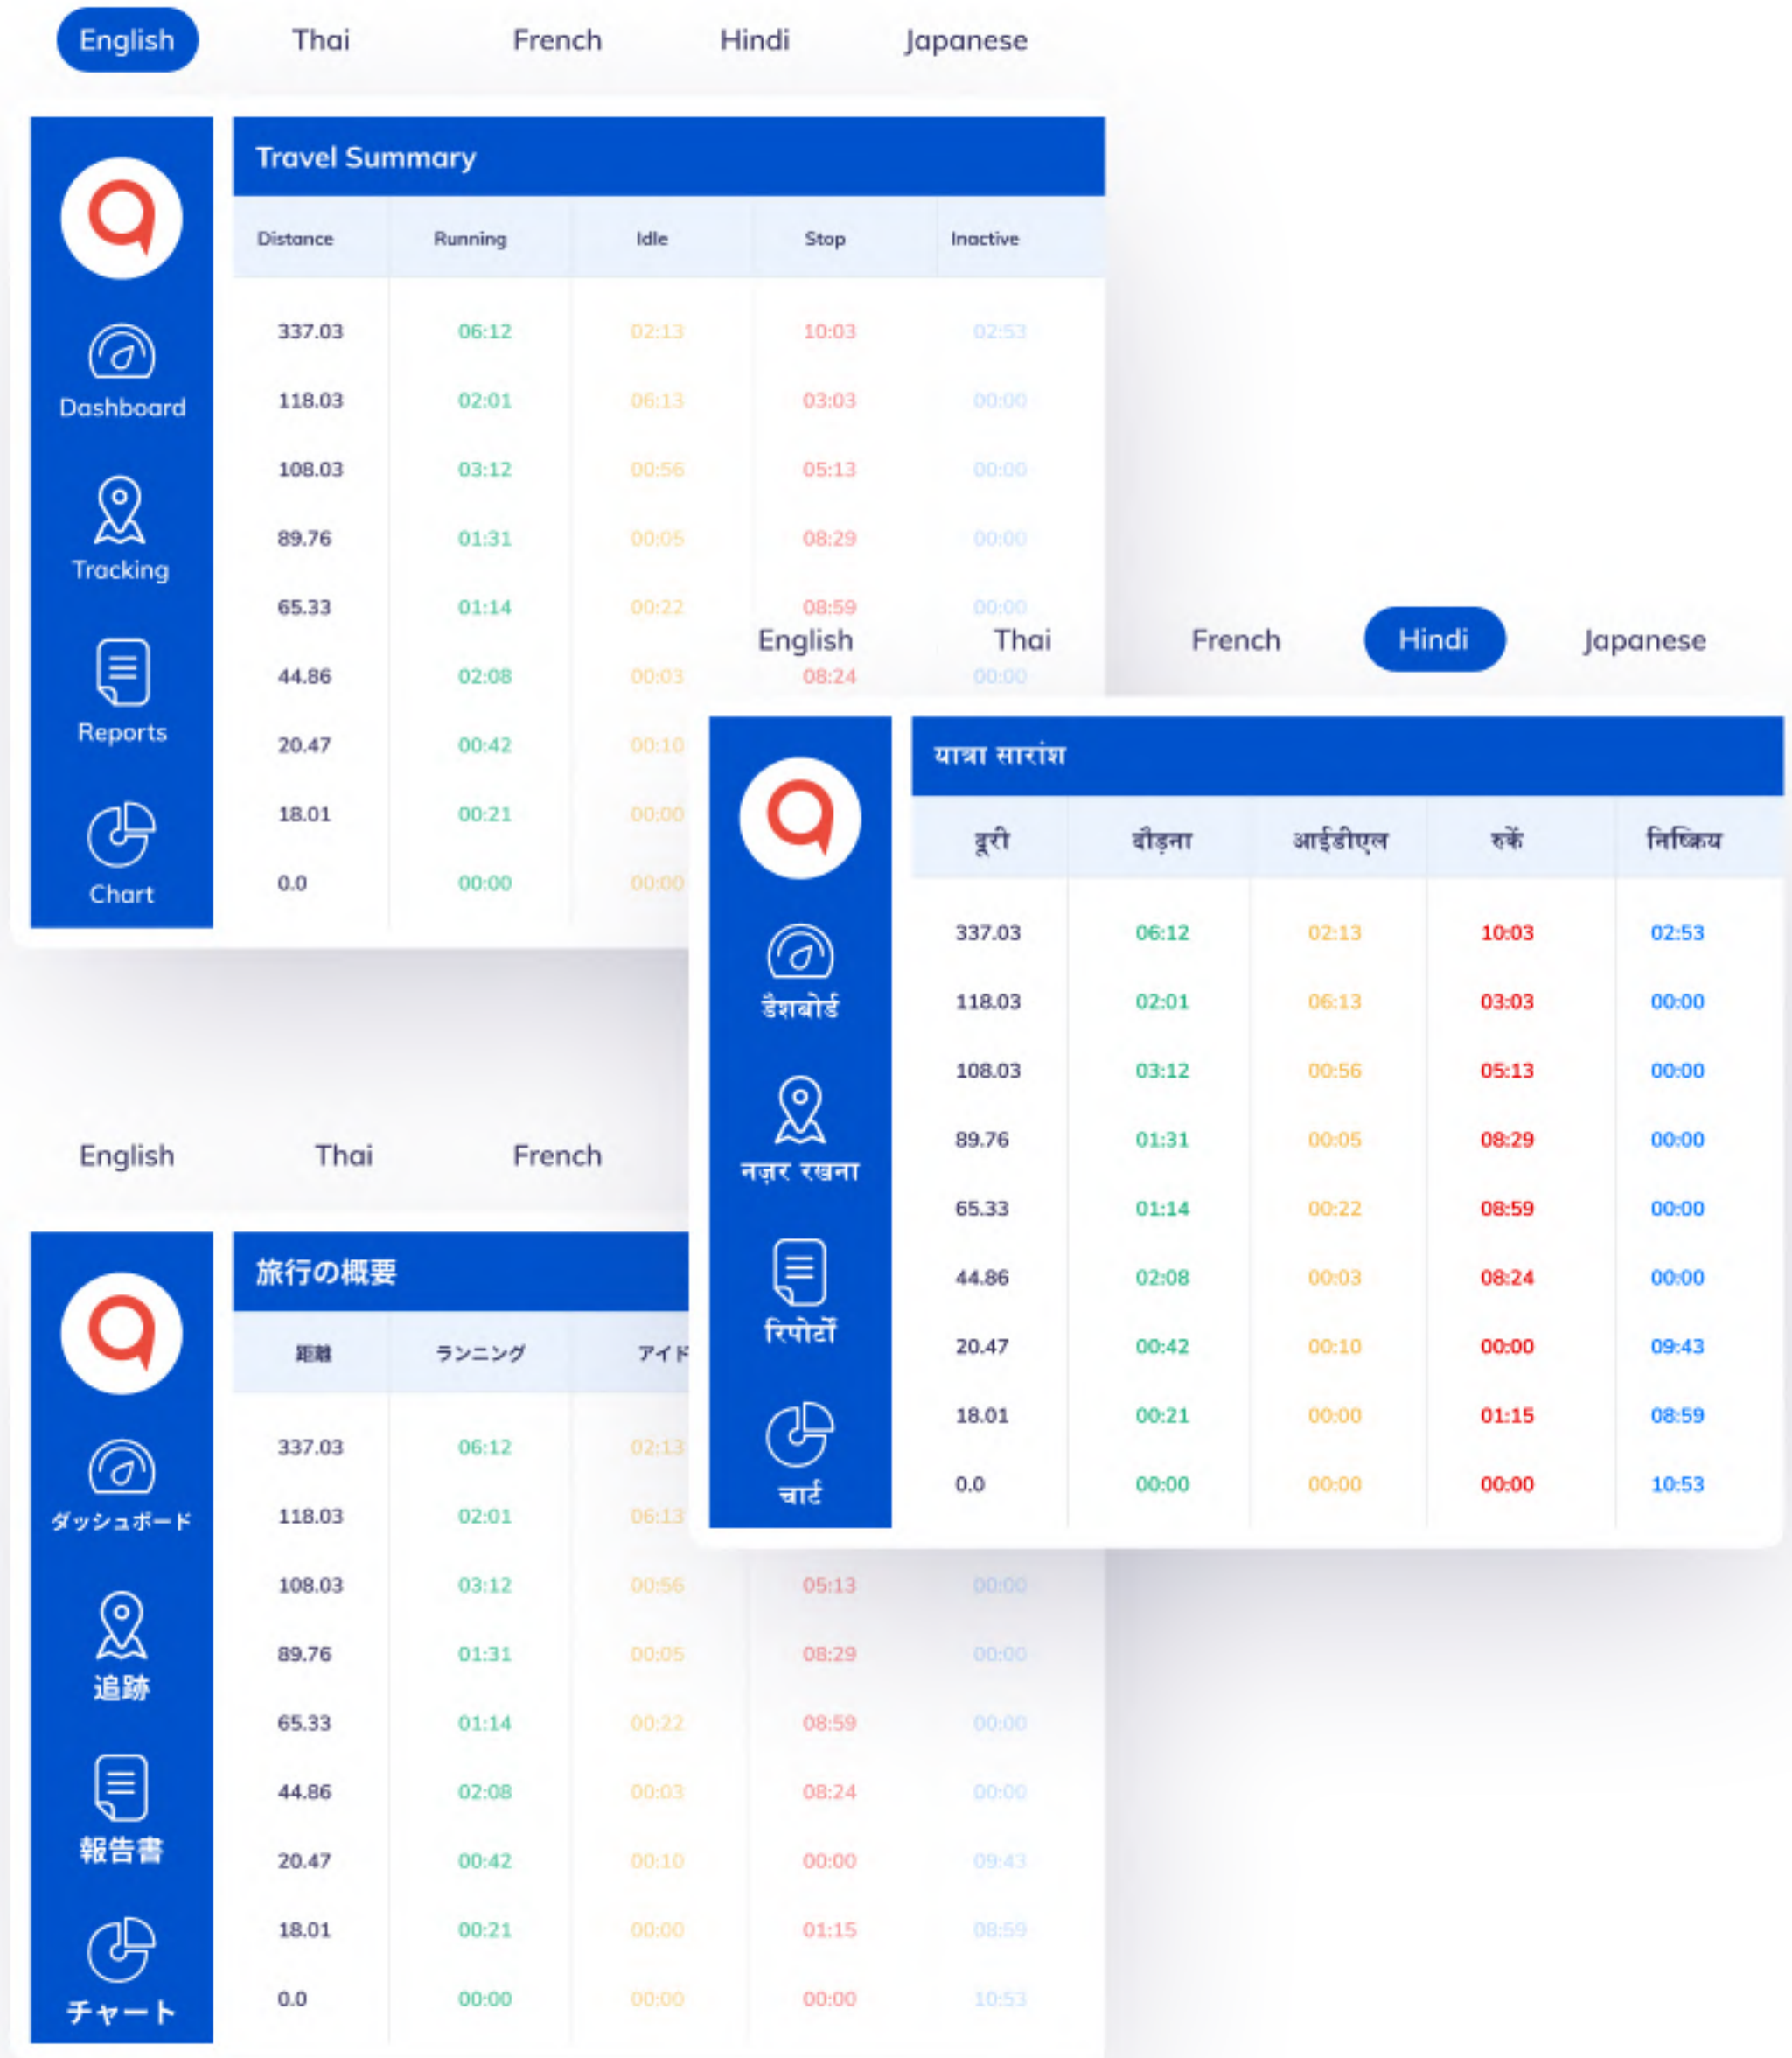

Replace keywords & simplify translation

Access our platform in regional languages

Scale business in multiple countries

7      "job_name": "Citizen trip test",
8      "pid": "111_1606761000000_1612117799000",
9      "completed_without_error": 0,
10     "completed_with_error": 0,
11     "failed": 1,
12     "approx_distance": 0
13   }
14 ],
~  "message": ""
~  }
```

# Multiple map integration

Most fleet management platforms will offer multiple map integration. What makes us different?

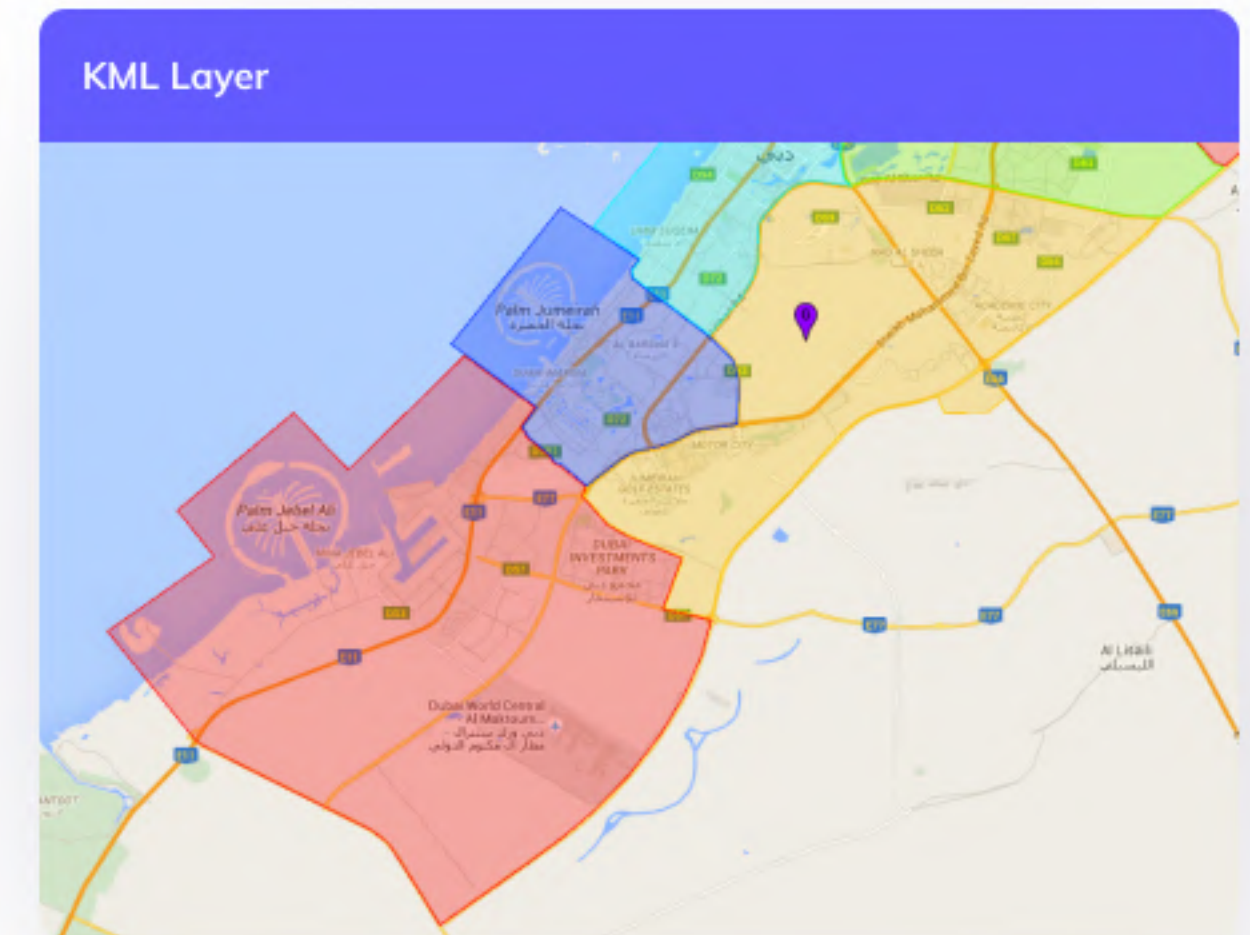

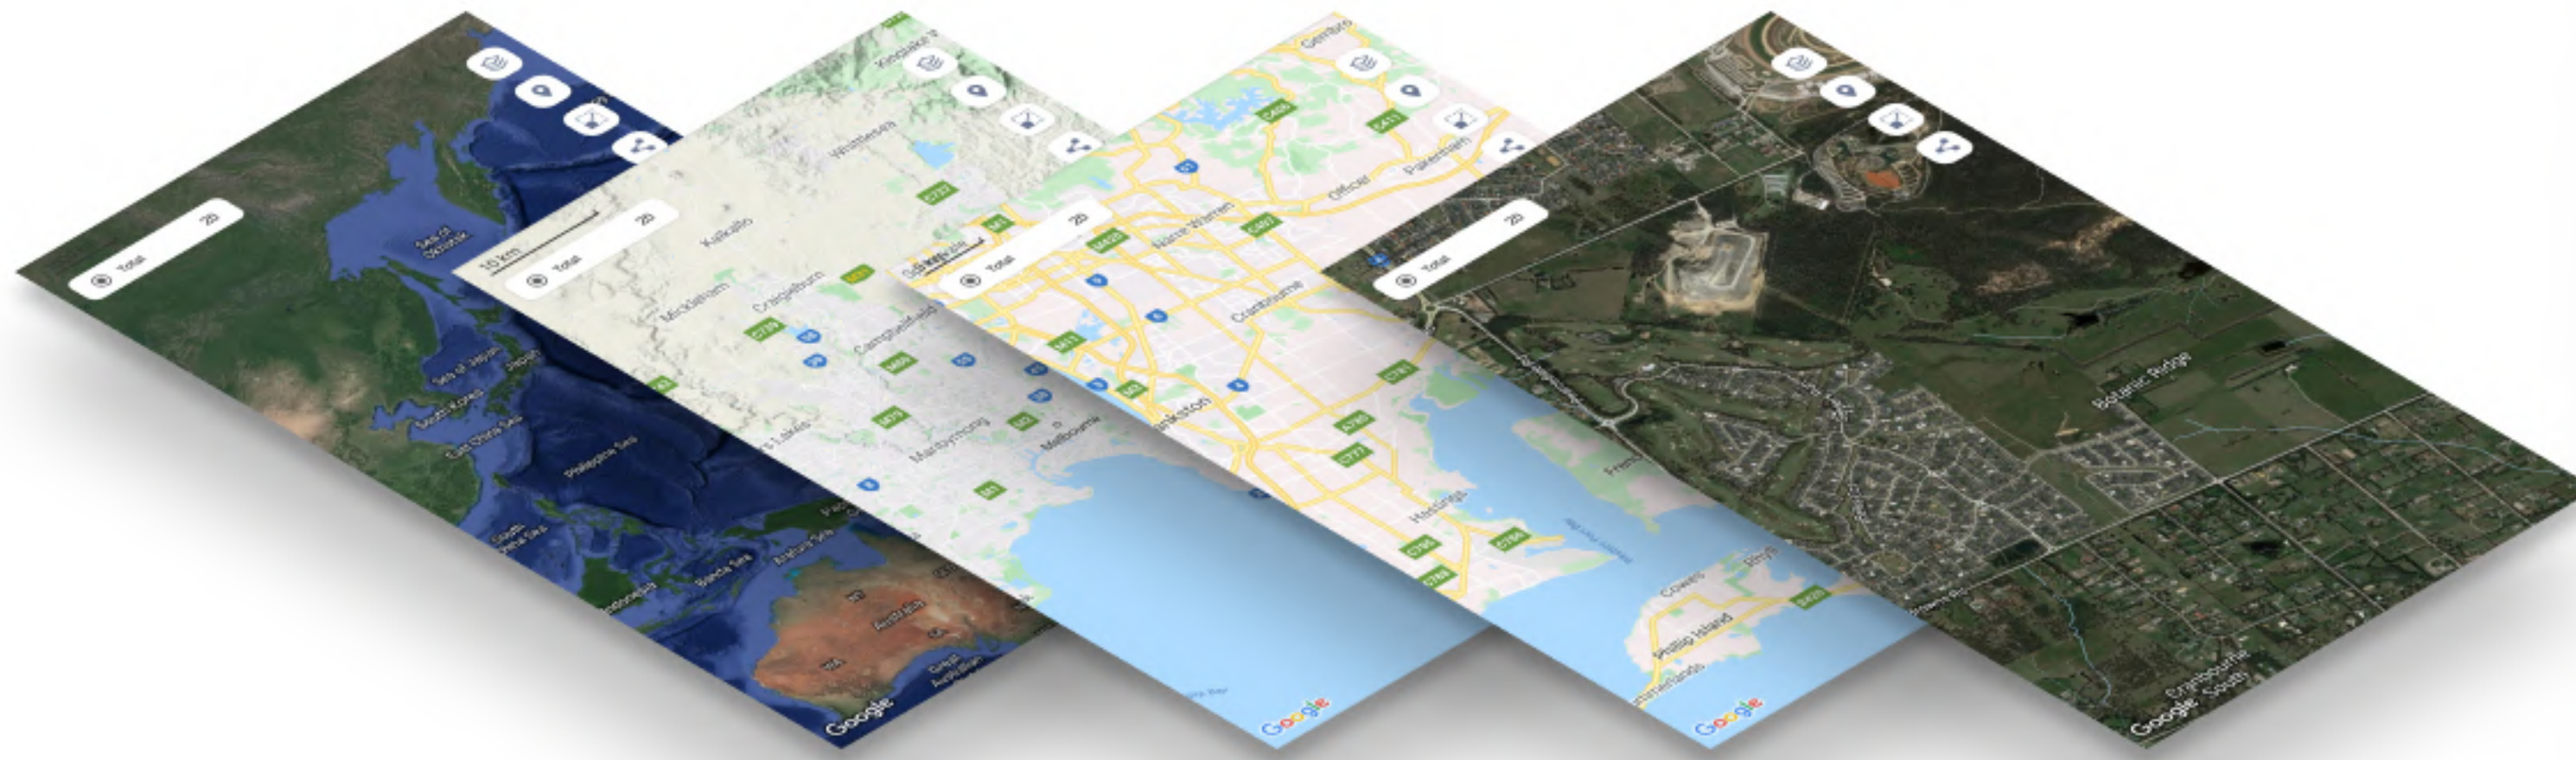

Integrated OSM, Google Maps, HERE, and Bing maps

Can add GIS services

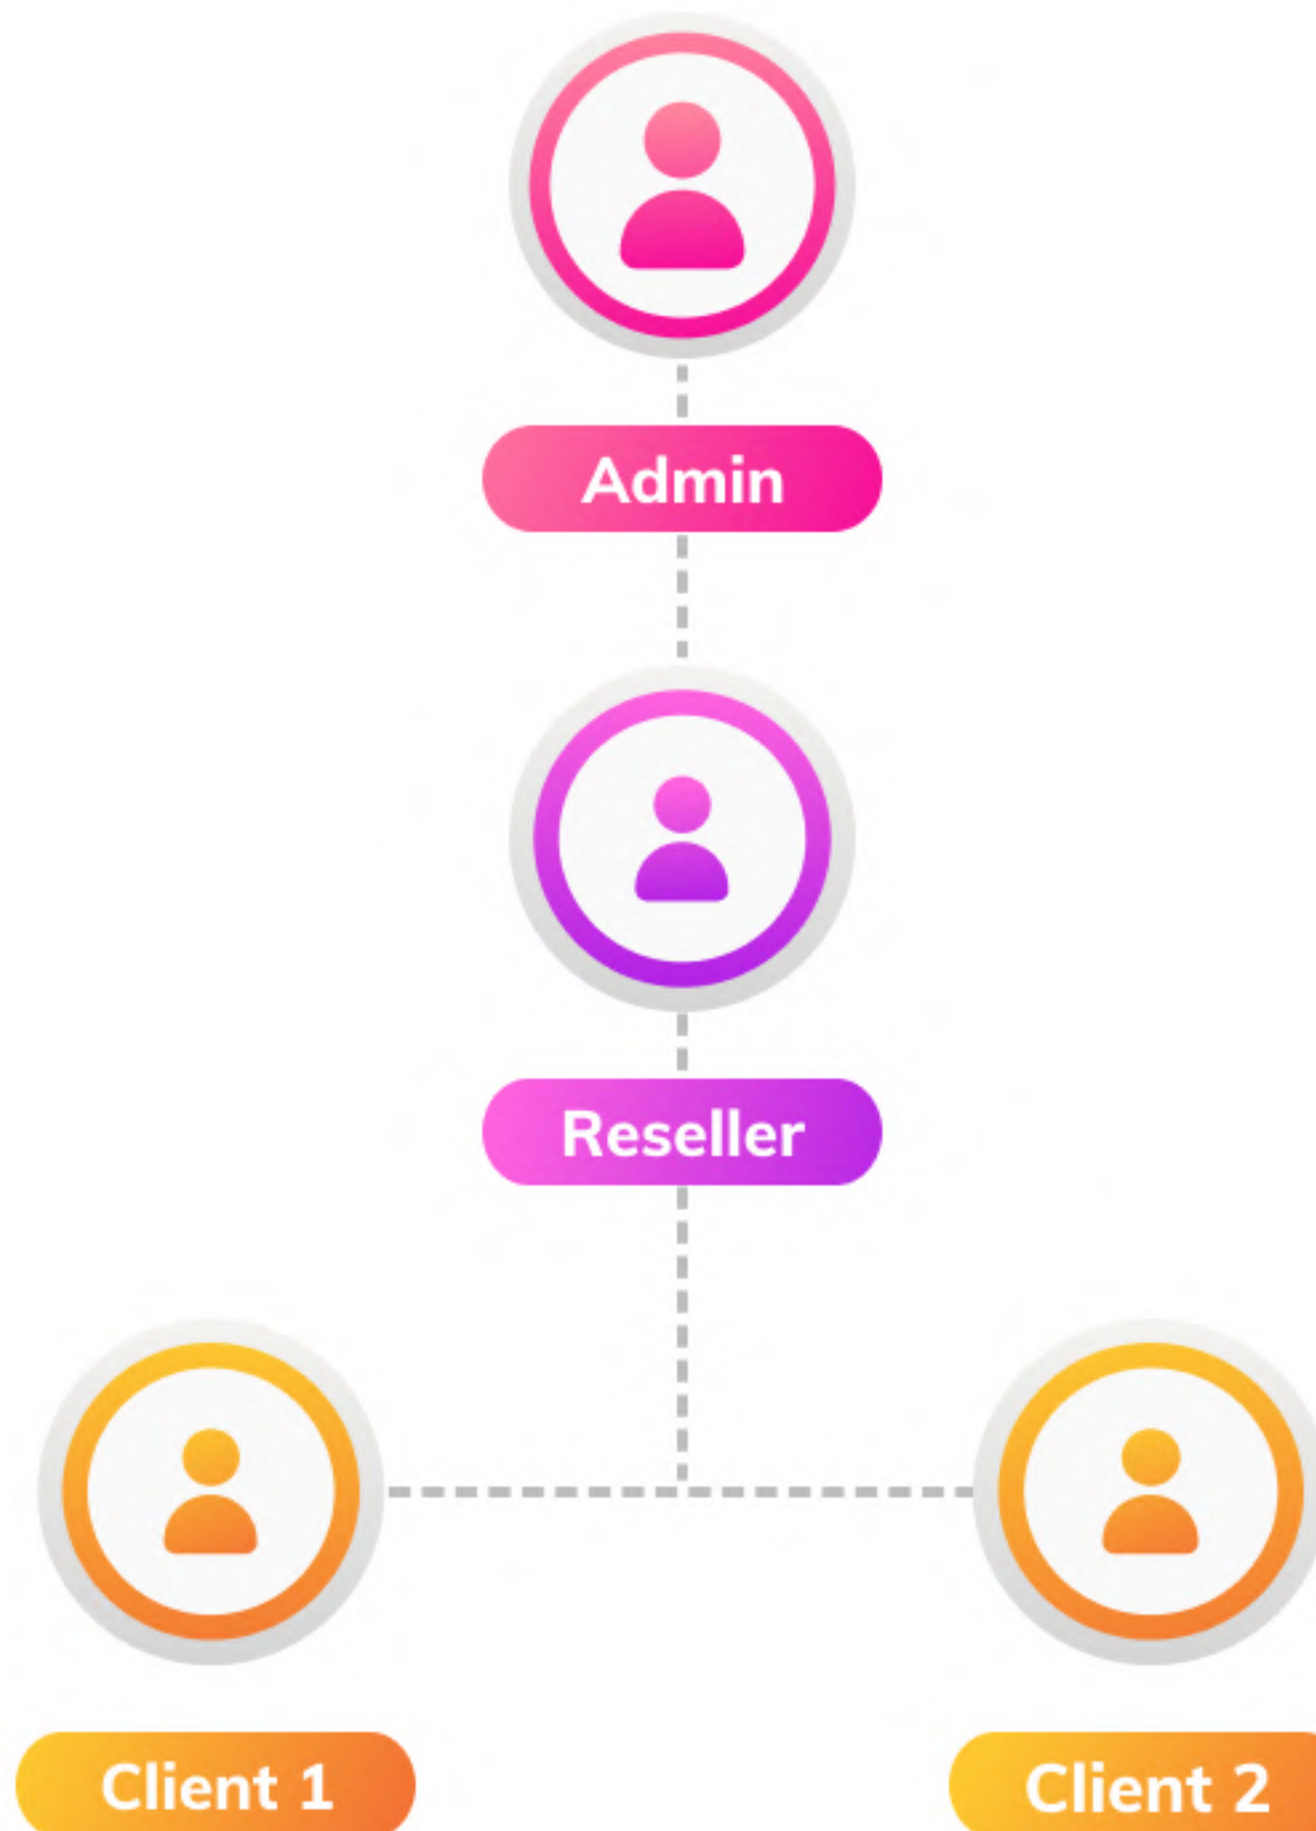

Provision to integrate regional, marine, and private maps as well

## User Hierarchy

Our platform operates on a multilevel user hierarchy. We prefer this structure because it simplifies billing, makes “heavy” accounts faster, and allows distinct storage periods for different accounts.

## Hosting

Our platform can be hosted either on a cloud or on-premises server. See the difference:

## Payment Gateway

We provide a one-stop payment module to simplify billing for all the users, irrespective of where they land on the user hierarchy. We offer flexible payment tariff plans so you can charge users accordingly.

High payment security

Payment due reminders

Receive invoice automatically

Third party payment gateway intergration

Pay \$250.00

## Support

We prioritize customer service and are always trying to improve our users' experience. That's why we have incorporated a conscientious customer support team into our organizational structure. Our customer support team is at the forefront of our customer interactions and plays a crucial role in retaining customers.

24/7 support

Support via calls, emails, and video conferencing

Ticketing System

Customer Success team helps clients when their business needs change

Free YouTube tutorials

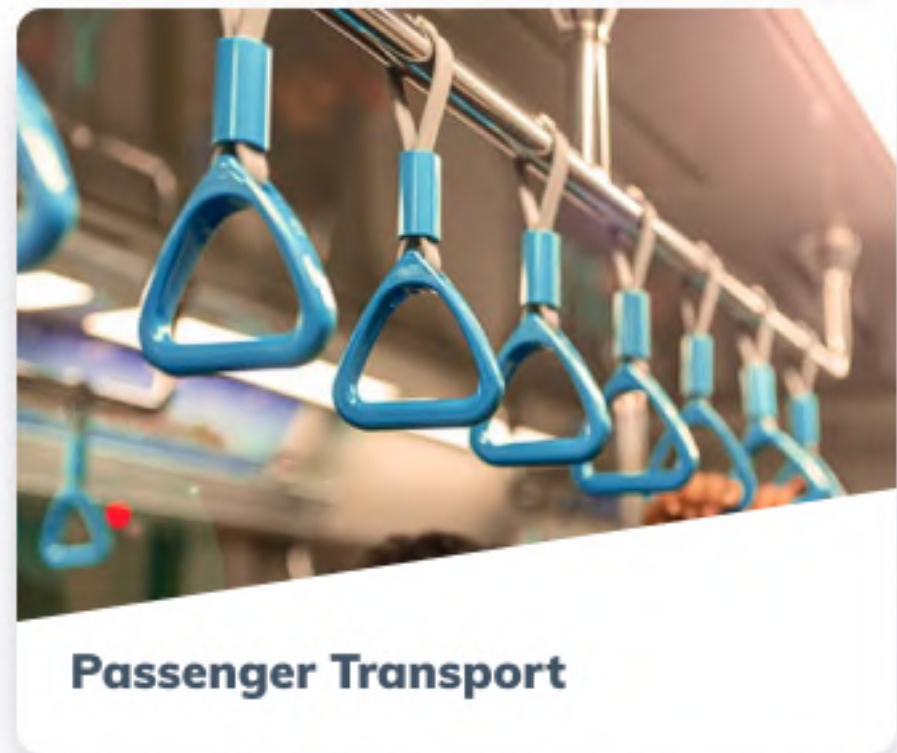

Complimentary software training for new clients

# → One platform for all industries

Our platform has served a wide range of industries and business niches. Here are a few:

# One platform for all industries

Our platform has served a wide range of industries and business niches. Here are a few:

**Emergency & Security**

**Energy**

**Financial Institutions**

**Fishing**

**Forestry & Wildlife**
